

Fast. Precise. Reliable.

With an easy-to-use system, precise hopper system control, rapid draft cycles, and intuitive interfaces, the oneWeigh bulk scale operation system is designed to improve your productivity and efficiency.

Features

- Rugged 780 bulkweighing controller
- Set up the bulkweighing controller as a component on your network via Ethernet connectivity with the flexibility to connect to and monitor from the plant control system
- RFID tools
- North American Railcar Data
- Integration to AGRIS and other ERPs and compatibility to various bulk scale designs

Benefits

- Fast and precise automatic loading and unloading
- Rapid draft cycles and elimination of trimming
- Hands-off operation with the support of RFID technology and the ability to custom configure the system to run automatically
- Minimal hardware requirements
